

Juan David Martinez Medina

SOFTWARE DEVELOPER | JAVASCRIPT, REACT, NEXT.JS, TYPESCRIPT, NEXT.JS | 6TH SEMESTER SOFTWARE DEVELOPMENT

+57 3143209494 | Villavicencio | juandamm099@gmail.com

PROFESSIONAL SUMMARY

I am a sixth-semester Software Development student, specializing in Full **Stack Development**. My main skills lie in **Next.js, React.js, React Native, Node.js, NestJS, JavaScript and TypeScript**, technologies I use to develop scalable web and mobile applications with excellent user experience.

I manage version control with **Git and GitHub** at an advanced level, and I work fluently with databases such as PostgreSQL and MongoDB. I also use modern tools such as **Postman, Prisma, Neon and the IDE Antigravity** to optimize development workflows.

Currently, I am expanding my knowledge in **Cloud and DevOps**, learning **AWS and Docker**, and implementing projects on platforms such as **Vercel and Railway**. I excel at strong communication, teamwork, and continuous learning, with the goal of growing as a Fullstack developer and delivering innovative, high-quality solutions.

PROFESSIONAL EXPERIENCE

Programming Logic Mentor | Minuto de Dios University Corporation – Villavicencio, Meta
Sep 2025 – Nov 2025 (On site)

- I provided technical support to students in algorithmic logic and problem solving using C++.
- I provided technical support to students in algorithmic logic and problem solving using C++.
- Strengthening technical knowledge in C++ and improving communication and academic leadership skills.

Fullstack Web Developer | Bioconstructores Asociados SAS – Villavicencio, Meta
Feb 2026 – May 2026

- I designed and developed a modern and scalable web platform using **Next.js, React.js, TypeScript, Prisma and Neon**, integrating a fully editable administration panel and control panel.
- I developed a premium interface with interactive animations using **Framer Motion, GSAP** and dynamic components of **React Bits** and **Aceternity UI**.
- I developed a backend structured exclusively with **TypeScript**, implementing cloud storage with **AWS S3** to manage images dynamically and make them editable from the administration panel
- Coordinated development of projects, adapting to new technologies and strengthening skills in **Fullstack Development** and workflow management with **Git and GitHub**.

EDUCATION

Minuto de Dios University Corporation – Software Development (6th semester)

CERTIFICATIONS AND COURSES

- Git and GitHub: Version control in web projects – Crehana, April 2025 (4h 52min)
- Kotlin: Create 6 apps from scratch with Android Studio. – Udemy, July 2025 (24.5h)
- Explorer programmer level – Ministry of ICT and CUN, 2025 (164h)

SKILLS AND INTERESTS

Skills: JavaScript, Typescript, React, Next.js, Node.js, Flutter, Nest.js, HTML, CSS, Git, GitHub, Prisma, Neon

Languages: Spanish (native), English (intermediate level B1/B2)

Interests: Personal projects, open source, learning new technologies, hackathons

Soft Skills: Teamwork, problem-solving, adaptability, communication
